Technical Data Sheet

1.Product Name

PRODUCT NAME: Optical Brightener Agent OB-2

C.I.: Fluorescent Brightener OB-2

CAS.: 2397-00-4

MOLECULAR FORMULA: -

MOLECULAR WEIGHT: -

2.SPECIFICATIONS AND PROPERTY :

ITEM	INDEX
Appearance	Yellow crystalline powder
Strength (equivalent to the standard sample)	100
Color Shade	Similar to Slightly Different
Purity	≥98.5%
Melting point	>275℃

Solubility: Insoluble in water, but soluble in high boiling point organic solvents.

High whitening force, strong fluorescence

2. Wide range of application, widely used for the whitening of polyesters, nylon fibre and various plastics.

3. Excellent resistance to high temperature.

3.APPLICATION:

An optical brightener for plastics (PP, ABS, EVA, PS and PC)..

4.PACKAGE:

Packed in 25kgs Fiber Drum.
